The Campaign for
Engineering future

UNIVERSITY OF CALIFORNIA, BERKELEY

Berkeley's College of Engineering continues to attract more than 90 percent of its first choice candidates for new faculty positions. Start-up funding to initiate new research programs and teaching projects is essential to attracting these young scholars and helping them thrive. Unrestricted support for the College helped launch the Berkeley career of assistant professor Ken Goldberg. Goldberg promises to do the

University proud: he is a recent Presidential Faculty Fellow, one of America's most prestigious honors for top young engineers and scientists.
